

The Nutrition Facts Label

Look for It and Use It!

Information you need to make healthy choices throughout your day

Found on all packaged foods and beverages

Use it to compare foods!

Choose the foods that are high in nutrients to get more of, and low in nutrients to get less of.

If you consume more calories than you burn, you gain weight.

400 calories or more per serving is high; 100 calories per serving is moderate.

Calories

Check the serving size on food packages. The information listed on the Nutrition Facts Label is based on one serving. Servings are shown in common measurements like cups, ounces, or pieces.

One package may contain more than one serving! If you eat multiple servings – you're getting "multiples" on calories and nutrients, too.
